Who am I .Net Developer for 15 years in desktop and web applications.
My experience goes to bug fixing and software development for a wide range
of business types: accounting, healthcare, point of sales, government,
security, warehouse and more.

Experience BairesDev (Fullstack Developer and Desktop Developer)
2018 - 2020

architecture with Angular, React, Typescript, RabbitMQ, Docker, WebApi.Net,
With BairesDev I worked two years as a full home office developer providing
solutions for Kapsch TrafficCom as Fullstack developer in a microservices

SQL and Oracle server as technologies. As for TicketNetwork, performing
bug fixing and new solutions related to PDF processing for the main product.

Contpaq (Senior .Net Developer)
2017 - 2018

Contpaq is the most successful accounting software company in México.
There I perform as a .Net Core developer working with Lucene.Net, SQL
Server, WCF and automation testing.

Tata Consultancy Services (Sql Developer and Fullstack Developer)
2014 - 2017

Sql Developer for CIGNA, an successful insurance company, performing data
manteinance tasks and report automation with SSIS.

Fullstack Developer for ABSG Healthcare division. AngularJS, MVC, restfull api.
Following TDD with NUnit. Analysis of UX for diverse healthcare areas such as
pharmacies, practices, nurses, patients, diagnostics, and so on.

Tiempo Development (FullStack and Senior .Net Developer)
2010 - 2014

Fullstack developer for ATA Retail as main developer for the migration of a
MSAccess 2003 solution into a Bootstrap - MVC.Net solution.
Regex Engineer and Senior Developer for Tripwire. In charge FIPS compliance
validation. Amazing project where I learned TDD with RhynoMocks, Moq, NUnit
and MSTests.

Bufete de tecnología y Soluciones Avanzadas (.Net Developer)
2007 - 2010

BTS is a company focused to fulfill a wide range of government needs.
I was in charge of create and mantain new systems in ASP.Net for the
Honduras goverment. Also in charge of the SQL Reporting Services Server
solution.

Equipos y Sistemas (All in one developer)
2005 - 2007

Developer for new products and bug fix for legacy code in Java, C#,
Visual FoxPro and Visual Basic.
Creation of a client-server application focused on multi business
owners in order to show real time sales for every point of sale running
independent of the platform (using only ODBC and web services).
